

Schuck Cushion Hitches

Built with a lifetime of service in mind. The Schuck Cushion Hitches contain injection molded Urethane Cushions to absorb thrust shock and a high density Polyethylene Bearing to increase tongue load. Cushioning reduces wear on the entire drive train of the truck, increases gas mileage through the reduction of jerk, and greatly reduces driver fatigue.

We recommend the 300 series for towing mostly empty wagons with very little tongue weight. The 700 series has twice as many cushions and bearings and works well for full wagons or applications with a good bit of tongue weight. The 800 series is super heavy duty! Applications include fertilizer dealers, tractor draw bars, and implements with excessive tongue weight.
